# WHISTLEBLOWING TECHNOLOGIES

Empowering Truth as a Human Right

# Definition of (cyber) security?

---

*A state of security is the absence  
of unmitigatable surprise. (Dan Geer)*

---

# *Cyber-weapons as a form of magic, and why we can't code our way to a safer internet*

---

Marcelo Rinesi Apr 17, 2018 [blog.rinesi.com](http://blog.rinesi.com)

«A *cyber-weapon* isn't a thing, but a skill.

*[...] but the technical knowledge of how to identify and exploit a set of systems, written clearly enough that a computer can do it. It's a recipe that can make millions of copies of itself even as it bakes the cake it describes, and even if all copies were to be deleted, all it would take to recreate it is a single person with the technical knowledge writing it down again. »*

---

*«It's a poem that, written down, unread by human eyes, causes havoc in the real world »*

Marcelo Rinesi Apr 17, 2018 [blog.rinesi.com](http://blog.rinesi.com)

Thanks for your time, there's never  
enough.
